

A Fast, Customizable, and Cost-Effective ePRO/eCOA Solution for Complex Studies. All with a Modern UI

Complex studies demand customizations that come with high costs and lengthy timelines. But with Curebase and our Study Designer you can launch in half the time compared to legacy platforms that cost much more.

Challenge us with your most complex ePRO/eCOA instruments, and let Curebase demonstrate how effortlessly we can build and deploy it. Our platform simplifies what traditionally required extensive programming on legacy systems, making it **easy and efficient**.

ID	STATUS	Run-in ePRO	Visit 1	Baseline ePRO
SUBJ_002	Study Start	84%	✓	✓
SUBJ_002	Completed	98%	✓	✓
SUBJ_002	Withdrawn	59%	✓	✓
SUBJ_002	Failed	59%	✓	✓

The first-of-its-kind Curebase Study Designer empowers:

Customized data collection

Tailor the user experience and data collection to your needs. Whether you prefer to configure the study workflow yourself or take advantage of our full-service offering, you have the flexibility to choose what works best for you.

Mid-study updates

Reduce total study duration by enabling your Data Management team to quickly implement MSUs, a task that previously required vendor programmers.

Shortened build times

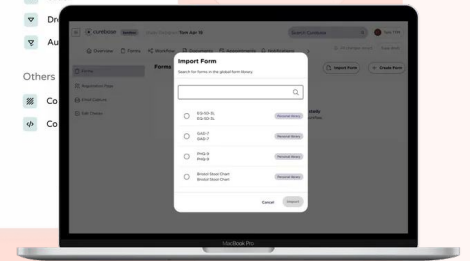

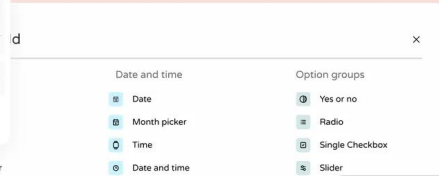

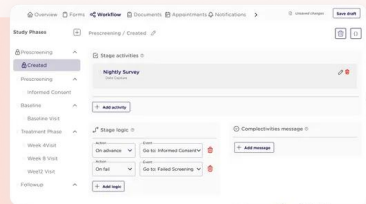

Curebase can deliver complex study builds in just 6-8 weeks, compared to the usual 12-16 weeks it takes other providers.

Extended cash runway

Reduce front-end build costs by up to 50% while enhancing day-to-day user and participant efficiency with a truly modern UI.

Powerful Study Designer capabilities:

- ✓ Over 30 question types built in
- ✓ Custom pagination
- ✓ Configurability in how the experience is displayed to the user, down to every pixel
- ✓ Advanced logic and pathing
- ✓ Computed fields such as automatic coding of eCOAs
- ✓ Supports multiple screen sizes with a 100% responsive design by default
- ✓ Customizable push notifications for reminders
- ✓ Real-time eCOA previewer that replicates common device sizes and types

Curebase's Study Designer even includes a pre-built library of over 100 complex, global-ready ePRO/eCOA instruments that are designed to offer a more intuitive and simple participant experience.

Our instrument library will allow you to

Build your own study or utilize our full-service offering, then save the study design in your library for future reusability, saving time and effort.

Take control of your library with the ability to make changes, white-label, and manage versioning. Our libraries include out-of-the-box forms, company-level form libraries, and personal form library options.

Create an intuitive and uncomplicated participant experience that leads to better retention, compliance, and satisfaction. This results in cleaner data exports for statistical analysis.

Let's build your next study together!

Curebase is the only ePRO/eCOA platform where powerful data collection meets user-centric design, allowing you to create Studies How They Should Be™.
